

# | Git Introduction in Hindi

BY THAPA TECHNICAL IN HINDI

# I What is Git?

Git is a distributed version control system(DVCS)

- Each user has a local copy of the complete history of the project, which is known as a repository.
- Users can work offline.
- Can easily synchronize repositories.

# Git

Git is a free and open source software project meaning that the code that implements Git is publicly available.

No single company owns Git, and anyone can make contributions to improve it.

# Git

## LINUS TORVALDS |

Git is a free and open source software project meaning that the code that implements Git is publicly available.

No single company owns Git, and anyone can make contributions to improve it.

# Hello Git!

Install the Git command line interface.

2. Verify your Git version.
3. Explore Git help.
4. Configure your user name, email address and default Git editor.
5. Then we will see important commands That we use a most like add, commit, log status, push ,pull, flags etc.

# | HOW TO INSTALL GIT

BY THAPA TECHNICAL IN HINDI

# Hello Git!

Install the Git command line interface.

2. Verify your Git version.
3. Explore Git help.
4. Configure your user name, email address and default Git editor.
5. Then we will see important commands That we use a most like add, commit, log status, push ,pull, flags etc.

Developer(s): Junio Hamano and others Written in: C, Shell, Perl, Tcl, Python  
Operating system: POSIX: Linux, Windows, macOS

**Git**  
System software  
  
Git is a distributed version control system for tracking changes in source code during software development. It is designed for coordinating work among programmers, but it can be used to track changes in any set of files. Its goals include speed, data integrity, and support for distributed, non-linear workflows. [Wikipedia](#)

1977 Thapa Technical - YouTube | ThapaTechnical | Git

https://git-scm.com

The screenshot shows the official Git website at https://git-scm.com. A green box highlights the 'Latest source Release' section, which displays '2.20.1' with a 'Release Notes (2018-12-15)' link and a 'Download 2.20.1 for Windows' button with a cursor icon. Below this, there are links for 'Windows GUIs', 'Tarballs', 'Mac Build', and 'Source Code'. The main content area features sections for 'About', 'Documentation', 'Downloads', and 'Community', each with an icon and a brief description. A thumbnail for the book 'Pro Git' by Scott Chacon and Ben Straub is shown. At the bottom, logos for various companies and projects using Git are displayed, including Google, Facebook, Microsoft, Twitter, LinkedIn, Netflix, PostgreSQL, and others like Eclipse and GNOME.

About  
The advantages of Git compared to other source control systems.

           [-p | --paginate | -P | --no-pager] [--no-replace-objects] [--bare]
           [--git-dir=<path>] [--work-tree=<path>] [--namespace=<name>]
           <command> [<args>]
```

These are common Git commands used in various situations:

start a working area (see also: git help tutorial)

clone      Clone a repository into a new directory

init      Create an empty Git repository or reinitialize an existing one

work on the current change (see also: git help everyday)

add      Add file contents to the index

mv      Move or rename a file, a directory, or a symlink

reset      Reset current HEAD to the specified state

rm      Remove files from the working tree and from the index

examine the history and state (see also: git help revisions)

bisect      Use binary search to find the commit that introduced a bug

grep      Print lines matching a pattern

log      Show commit logs

## Create a new repository

A repository contains all the files for your project, including the revision history.

Owner Repository name \*

 vinodvlog /

Great repository names are short and memorable. Need inspiration? How about glowing-octo-spork.

Description (optional)

 Public  
Anyone can see this repository. You choose who can commit.

 Private  
You choose who can see and commit to this repository.

Initialize this repository with a README  
This will let you immediately clone the repository to your computer. Skip this step if you're importing an existing repository.

Add .gitignore: None  Add a license: None  

Thapa Technical

Firefox browser window showing multiple tabs and the GitHub 'Create a new repository' page.

Tab titles include: (2042) Thapa Technical, Please verify your email, Hello World · GitHub G, Vinod Thapa · GitLab, [GitHub] Please verify, Create a New Repository.

The GitHub page shows:

- Create a new repository**
- A repository contains all the files for your project, including the revision history.
- Owner:** vinodvlog
- Repository name \***: (input field)
- Great repository names are short and memorable. Need inspiration? How about glowing-octo-spork.
- Description (optional)**: (input field)
- Visibility:**
  -  **Public**: Anyone can see this repository. You choose who can commit.
  -  **Private**: You choose who can see and commit to this repository.
- Initialize this repository with a README**: This will let you immediately clone the repository to your computer. Skip this step if you're importing an existing repository.
- Buttons: Add .gitignore: None ▾, Add a license: None ▾, ⓘ

Scanned with CamScanner

The screenshot shows a GitLab interface for a repository named 'demoyoutube'. The repository was created by 'Vinod Thapa' and has one commit. The commit message is 'first commit index file added' and it was authored by 'Vinod Thapa' 11 minutes ago. The commit hash is '61ae0777'. The file 'index.html' is displayed with its content: '1 Vinod bahadur Thapa' and '2 alias thapatechnical'. The sidebar on the left lists other repository sections like Project, Repository, Files, Commits, Branches, Tags, Contributors, Graph, Compare, Charts, Issues (0), and a Collapsible sidebar.

The screenshot shows the GitHub desktop application interface. At the top, there's a navigation bar with File, Edit, View, Repository, Branch, and Help. Below the navigation bar, the current repository is set to "coronavirs.github.io". The "Current branch" is "master", and the status is "Fetch origin" with a note "Last fetched 7 minutes ago".

The main area displays a commit history. The first commit is titled "Initial commit" and was made by "Vinod Bahadur Thapa committed" with a commit hash "0d5a29e" and "1 changed file". The file shown is "README.md", which contains the text "+# coronavirs.github.io".

On the left sidebar, there are other commit entries: "publishing corona website" by "thapatechnical committed an hour ago" and another "Initial commit" by "Vinod Bahadur Thapa committed an hou...".

At the bottom right of the application window, there is a timer reading "2m 14s 45".

Technical  
www.thapathtech.com

4m 50s 05

Scanned with CamScanner

The screenshot shows a browser window with multiple tabs open, including 'index.html', 'https://thapatech...', 'Options', and 'GitHub Desktop'. The main content is the 'Settings' page for a GitHub repository at [github.com/thapatechnical/coronavirus.github.io/settings](https://github.com/thapatechnical/coronavirus.github.io/settings). The 'Allow rebase merging' option is checked, and a note says: 'Add all commits from the head branch onto the base branch individually.' Below it, a note states: 'After pull requests are merged, you can have head branches deleted automatically.' The 'Automatically delete head branches' option is unchecked, with a note: 'Deleted branches will still be able to be restored.' The 'GitHub Pages' section is shown, with a note: 'GitHub Pages is designed to host your personal, organization, or project pages from a GitHub repository.' A dropdown menu for 'Source' is open, showing 'None' (selected), 'master branch', 'master branch /docs folder', and 'None' again (disabled). The Windows taskbar at the bottom shows various pinned icons and the date/time: 10:14 AM, 4/19/2020.

4m 51s 04

Thapa Technical

Scanned with CamScanner

The screenshot shows a browser window with multiple tabs open. The active tab is 'github.com/thapatechnical/coronavirus.github.io/settings'. The page displays GitHub Pages settings, including an option to automatically delete head branches and a section for selecting a source branch. A dropdown menu is open, showing 'master branch' selected, with a note about using it for GitHub Pages. Other options include 'master branch /docs folder' and 'None'. Below the source selection, there are options to make the repository private or transfer ownership.

Automatically delete head branches  
Deleted branches will still be able to be restored.

4m 54s 85

The screenshot shows a Windows desktop environment. At the top, there is a taskbar with several open windows: 'Thapa Technical' (active), 'Git Tutorial', 'index.html', 'https://thapatech...', 'Options', 'thapatechnical/...', and 'GitHub Desktop'. Below the taskbar is a search bar with the placeholder 'Type here to search'. The main content area displays the GitHub Pages settings for the repository 'thapatechnical/coronavirus.github.io'. The settings include options for 'Allow rebase merging' (checked) and 'Automatically delete head branches' (unchecked). Below these, it says 'After pull requests are merged, you can have head branches deleted automatically.' Under the 'GitHub Pages' section, it states 'GitHub Pages is designed to host your personal, organization, or project pages from a GitHub repository.' It shows the published URL as 'https://thapatechnical.github.io/coronavirus.github.io/'. The 'Source' section indicates the site is built from the 'master branch'. The 'Theme Chooser' section has a button 'Choose a theme'. The 'Custom domain' section is currently empty. In the bottom right corner, there is a watermark for 'Thapa Technical' and a system tray showing the date and time as '10:14 AM 4/19/2020'.

The screenshot shows a GitHub profile page for a user named Vinod Bahadur Thapa. At the top, there's a navigation bar with links for Pull requests, Issues, Marketplace, and Explore. Below the navigation is a header section with a profile picture of a man wearing sunglasses and a dark suit, the name "Vinod Bahadur Thapa", and the handle "@thapatechnical". There's also a link to the user's website: <https://www.thapatechnical.com/>. The main content area is titled "Popular repositories" and lists three repositories: "hellogit", "thapaanilgit", and "badmintonleague". Each repository entry includes a thumbnail, the repository name, a brief description, and an "HTML" button.
